

EMPATHY MAP

Food Delivery App User

Dhakshanya • BCA – 1st Year • 17 August 2026

Understanding a college student's needs, thoughts, actions, feelings and expectations while using a food delivery app.

Problem + User Profile

PROBLEM

Delayed delivery • high delivery charges • unclear order status • unavailable restaurants • incorrect orders • slow support.

USER

A college student who frequently orders food and wants affordable food, quick delivery, easy navigation, accurate tracking and simple payment.

What the user says, thinks, does and feels

SAYS

"I want my food to arrive on time." • "I need affordable delivery charges." • "I want to know where my order is."

THINKS

Is the restaurant reliable? • Will my food be fresh? • Is the estimated delivery time accurate?

DOES

Searches restaurants • compares prices/ratings • checks reviews • orders • tracks delivery • rates service.

FEELS

Happy when ordering is quick and convenient; worried when delivery is delayed or status is unclear.

Where the experience can improve

PAINS

Late delivery • extra charges • wrong/missing items • poor support • inaccurate tracking.

NEEDS

Affordable prices • reliable delivery • clear tracking • easy payment • quick customer support.

EXPECTATIONS

Smooth ordering • realistic delivery time • useful notifications • clear pricing • reliable support • convenient, affordable and trustworthy experience.

Turn empathy into better design

PROPOSED IMPROVEMENTS

- 01 Accurate live tracking
- 02 Transparent pricing
- 03 Personalized recommendations
- 04 Reliable delivery-time estimates
- 05 Easy cancellation & refund options
- 06 Faster in-app customer support

CONCLUSION

The empathy map helps designers understand real user experiences and create a more user-friendly and satisfying food delivery experience.
